E-mobility at Hahn Airport: Ten new electric vehicles in use

TRIWO Hahn Airport is focusing on e-mobility and has purchased ten new electric vehicles. The six T6 buses and four caddies are replacing diesel vehicles and are already in use. They serve as pilot vehicles for aircraft ("follow me"), transport aircraft crews and support the work in the workshops and in operations, for example.

The airport has 17 charging stations to ensure that the e-fleet remains operational. More stations are already being planned. The Abt e-Line vehicles, which were developed in cooperation with Volkswagen, offer a range of up to 130 kilometers and are ideally suited for use at Hahn Airport.

"Electric vehicles are a central pillar of sustainable mobility," says Rüdiger Franke, Managing Director of TRIWO Hahn Airport. "We will be equipping our fleet with more electric vehicles in the future."

An eleventh electric vehicle has already been ordered and will soon be delivered to Hahn Airport. This is also a T6 bus. "We are also planning to purchase handling equipment with an electric drive," announces Managing Director Franke.

About TRIWO Hahn Airport

From an American military airfield to an international commercial airport with 24-hour operations: since its civilian opening in 1993, Hahn Airport has developed into an important aviation location for passengers and freight. In 2023, TRIWO Hahn Airport counted 1.7 million passengers – an increase of 21 percent compared to 2022. TRIWO AG has been the owner of the airport company TRIWO Hahn Airport GmbH since May 2023.
